

TARO VINÍCOLA

TINTO 2021

ORIGIN

Lanzarote, Canary Islands.

VARIETIES

100% Listán Negro.

VINEYARD

From an own-rooted organically farmed parcel at 215m near La Vegueta in central Lanzarote. The vines are 20 years old and planted on clay-calcareous soils covered with black volcanic ash (picón).

VINIFICATION METHOD

The grapes were harvested and destemmed, then macerated on their skins for 6 days in stainless steel tank with temperature control before pressing with a vertical press. Rested for 10 months on its lees in stainless steel. Bottled without fining, filtering, or sulfur addition at any point.

PROPERTIES

Alcohol: 11.6%
Total Sulfur: ~15ppm, none added
pH: 3.7
Bottles Made: 240

PRODUCER PROFILE

Pablo Matallana is a young, forward-thinking winemaker based on the Canary Island of Tenerife. Through organic viticulture and thoughtful winemaking, Pablo seeks to showcase different grape varieties and the unique terroir of the Canaries. Pablo studied enology at the highly respected Polytechnic University of Valencia, and after graduation he worked in both Chile and Priorat before returning to Tenerife to pursue his own project. Lanzarote has a markedly different landscape than Tenerife since it is the closest to Africa of the seven-island chain and dramatically more arid. The majority of vineyards Pablo is working with are in the central part of Lanzarote, near Timanfaya National Park. The island sees only 18 days of rain per year on average, with a total of about 6 inches, making grape cultivation very difficult. Coupled with the intensely hot and dry trade winds known as the Calimas, vines are typically planted in hoyos (walled holes) or zanjas (trenches) dug in the ground for protection. Due to a period of major volcanic activity in the 1700s, vines must grow through one meter of volcanic ash (locally known as picón) to reach water in the underlying clay.

VINTAGE REPORT

After a brutally dry 2020 (and drought since 2018), 2021 was a very welcome departure. During the 2020-2021 winter season the vines were replenished with rains, temperatures were mild during the year, and harvest began on July 20th. Yields were more than 50% greater than 2020, and quality was very high.
