

José Pastor Selections

IMPORTER OF FINE IBERIAN WINES

Grower Nacho Gonzalez

Appellation VdT Valdeorras

Locality Larouco

Climate Atlantic, Mediterranean

Varieties 95% Palomino,
5% Garnacha Tintorera

Soil Granite, Clay

Elevation 350-650 meters

Vine Age 50-70 years

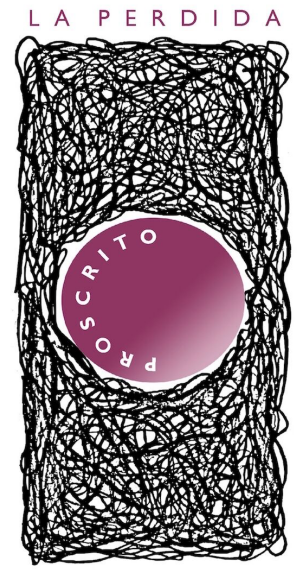

Pruning En Vaso

Farming Organic/Biodynamic

Production 183 cases (6pk)

La Perdida

Proscrito 2017

Nacho Gonzalez is one of the most progressive natural winemakers in all of Galicia. He actively seeks out vineyards that are isolated and remote. Up the hillsides, away from other farms, and down winding roads, he finds old abandoned vineyards and works to bring them back to health. He currently works with six vineyard sites in what would be the DO of Valdeorras, totaling about 4 hectares of vines. His approach to farming is to treat the vineyard as an ecosystem: allowing growth between the vines, using some biodynamic practices, and planting cover crops to help with disease and pests. Grapes are hand-harvested and foot-trodden. Nacho favors tinajas (Spanish tapered, clay amphora) and very old oak barrels for his aging vessels. Nacho is very experimental in the winery, despite being steadfastly traditional in the vineyard; sulfur has never been used.

Nacho's cellar is located in the small town of **Larouco**. The age of his vines range from 50 to 70 years old, with the oldest of his holdings coming from his grandmother. Larouco is home to many old bush vine plantings, a rarity in Valdeorras where the vineyards are mostly younger and trained in espaldera (double cordon). Another unique trait of Larouco is the presence of granite and clay soils, versus the more predominate slate of the region. Granite tends to give a pronounced purity and lightness to wines with a saline streak; clay gives structure and elegance.

Proscrito comes from various parcels in Larouco that Nacho has been renting since 2014, with old vines yielding under 2kg of grapes each of **Palomino** and a little bit of **Garnacha Tintorera**. The grapes were hand-harvested, destemmed, and pressed into used 400L chestnut and 300L French oak barrels for primary fermentation, then raised 4-5 months in steel tank before being bottled without fining, filtration or added SO₂. This is a bright and refreshing mountain *clarete*, with a bright cherry hue, strawberries & citrus peel aromatics, and backed by bright acidity and texture.
